Changeable lamps on site and varies of lamp design for different applications;

Lamp	Wavelength	Spot size
#1	500--1200nm	47x21mm
#2	400--1200nm	47x21mm
#3	500--1200nm	20x10mm
#4	400--1200nm	20x10mm
#5	500--1200nm(thin glass)	47x21mm
#6	750--1200nm	47x21mm

Unique bi-lamp tube technology
Spot size:21mmX47mm

Unique bi-lamp tube technology with wide spot size and high efficiency;

Filter detrimental spectrum UV and output wide spectrum energy;

New handpiece, ergonomically designed for the hand and providing more powerful cooling results.

- Intellectualized controlling technology of charging and discharging, assures accurate output energy;
- Energy storing element discharges completely to avoid accident resulted from excess energy;
- Internal modular design, easy installation and convenient maintenance.
